

## A Plan for A New Impartial, Values, and Law-Based World (A Two Page Summary.)

1. I am proposing that we reform; tear down and rebuild the United Nations so that it becomes neutral and has the duty and means to take care of and govern, **with all the member nations, ONLY MAJOR worldwide issues**, such as wars, unruly dictators, human abuse issues, mass refugees, famine, human rights, lack of fundamental freedoms, major environmental issues, economic slavery, human trafficking, pandemics, worldwide pollution, state-sponsored terrorism, cybercrime and hacking, biological and nuclear arms reduction, and other similar major issues must be decided in a neutral, unbiased way.

I understand that many people's **initial reaction** is adverse because of all the conspiracy theories out there. But we **can** rebuild the UN so that **it will govern with member nations**, with new values, and rules, laws, and is neutral, without politics, or religion. (A lot more about this in my longer PDFs.)

**There just isn't any other comprehensive way to save this planet; name one.** We just cannot remedy all the major worldwide problems that we have with some token changes here and there.

### **Let's create a New Impartial, Values, and Law-Based United Nations**

Every **sovereign nation will have the right** to make its own rules and laws regarding political views, governing systems, official religions, etc., but being treated with respect doesn't belong to just the rich and elite. Dignity, freedoms, and basic human conditions are everybody's inherent rights, and every nation must provide them to its citizens. **The New UN will ENHANCE sovereign nation independence and freedoms as much as possible. Our countries, cultures, and people's diversity are something we must treasure.**

The New UN will not become some kind of absolute ruler of the world. Also, this is not a One World Government or a globalist agenda. The New UN will only concentrate on **MAJOR** worldwide issues that must be solved **IMPARTIALLY** for the good of the people and the world. Also, it's not the New UN that will alone decide what to do with these issues, but **all the member nations will vote** on them. The New UN will be run **by professionals**, not by career politicians. There will be countless internal and external **safeguards to ensure that the New UN will act neutrally by its new values, rules, and laws.**

**2. Wars.** The NUN and **all of its member nations** are **duty bound to defend** any country, by any means necessary that is attacked. How could any nation attack any other nation because then they would be at war against the whole world? **All wars stop here!**

The **New UN will not have armed forces.** If needed, it will hire armed forces from the nations that have them. Even though many smaller countries will reduce their defensive forces, most larger countries will keep their armies for a long time to come. If we have lasting peace, then most countries can use 80% of their defense budget for other needs.

**3. How do we accomplish this?** By starting a massive email and social media campaign, in which people around the world are instructed to email all of their city, county, state, and national elected representatives that for them to get their votes in the future, these politicians must declare that they support the UN reform. **The idea is to pressure and show that We The People want to reform the UN.**

We must pressure the media, businesses, organizations, schools, churches, important people, etc., to support this movement. And why would they not support it? **Only bad people don't want peace.**

**4. The easiest way** to get this email/social media revolution going is to **get celebrities and other influential people** on board with this idea. Celebrities, sports stars, musicians, other influential people, social media companies, businesses, churches, schools, and peace organizations are all

critical parts of this plan. The idea is to have these celebrities, media, and organizations introduce the idea of reforming the UN to their fans, followers, members, and customers. **That's all it will take to get the ball rolling!**

**5. How do we launch this movement?** We will employ an advertising company because they know how to sell this idea to people, celebrities, charities, and politicians. **Selling ideas and dreams is their business! The biggest hurdle is to convince the people that the New UN could be neutral and not become some kind of a globalist organization.**

An advertising company could easily set up, and mind websites and social media sites, produce the media kits, print/film ads for all the different media, line up the celebrities, and keep this effort going with PR and ads, as long as it takes to get the UN reform done. **This campaign is not a one-off.**

**6. How can we fund this movement?** The beauty of getting advertising companies involved in this movement is that they are always looking for jobs/\$. These advertising companies could approach philanthropists and charities, and **ask for donations** to pay for running the UN reform movement. (We let the ad companies find the money for this citizen movement.)

Once we get some high-caliber celebrities, and other influential people on board (credibility), then the super-rich philanthropists, different foundations, and businesses will happily open their wallets: the money will pour in. Also, most A-list movie and sports celebrities have their charitable funds and would most likely contribute donations to this movement.

**Who would not want to be part of the history of transforming the world?** Once people of the world realize that this idea is DOABLE and CAN change the world for the better, they will support it with open arms. This movement will grow like wildfire.

Some nations; the US, China, Russia, North Korea, Venezuela, etc., will be against this plan, but we don't have to convince all the countries in the world to support this. If we have about 60% of the countries on board with us, then we can demand a vote on this in the UN. Countries that are against this idea, will show that **they support the current turmoil and wars because they profit from it.** After a while when people realize that peace is much better for all of us, all nations will join the New UN.

Can you **IMAGINE** how the world would be if we had a New Impartial, Value, and Law-Based World Order? **There just isn't anything more significant than this endeavor; saving the world!** Do you want to be a part of the history of transforming and redefining the human experience on the planet earth well beyond our imaginations?

Michael Møller, director-general of the United Nations Geneva office, said about the UN: *"There isn't a single one of these [global] problems that can be solved by a single actor. We have to do it together; otherwise, we shall all die together."*

**Don't underestimate the power of an idea whose time has come.** - Victor Hugo

None of the current turmoil and mess would have happened if we had a strong UN. **This is not just a dream, this is doable, and unfortunately, it's the only way we can save this planet and make it into a paradise that it should have been a long time already.** WHY DO WE LET THREE COUNTRIES RUIN THIS WORLD FOR ALL OF US? The US, Russia, and China want to keep constant turmoil and wars going on because of the spoils of war, power, and our leader's big egos.

We should not try to create a new organization but reform the UN so that it serves all nations in the world. Only then we can get everybody's support for it.

These are just some of the main points of this plan, but there are a lot more details. If you care to explore them; go to this website: [www.law-based-world.org](http://www.law-based-world.org) Feedback: [info@law-based-world.org](mailto:info@law-based-world.org)
